Full plan from the 9:00 AM gun. Front = her real 2023 line (she was **3h20 inside the cutoff** at the mi-64 DNF — the clock was never the problem); home = the 32-hr goal. **Slower 33-36 hr finishes on the back.** Live → myrecoverysteps.com/rrrr

SLOWER FINISHES

FINISH
32–36h

The front is the 32-hr goal. If she's slower out of Olympian (**mi 64 ~4:25a**), read the column she's holding. **Every one clears every cutoff** — even 36:00 lands right on the 9:00p buckle.

THE REAL FIGHT = THE NIGHT The solo loop into Olympian is what ended '23 — cold, alone. Leave Olympian OUT **warm, lit, fueled, caffeinated**. Warm **before** she's cold.

HOME FROM MI 64 32h ≈ 20 min/mi · 36h ≈ 26 min/mi. Jason paces to Summit (mi 81); fuel ~60g carb/hr + caffeine.
